***Response to Amendment***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/27/06 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Any objections or rejections made in a previous Office Action that are not herein reinstated have been withdrawn.
4. Claims 25, 28, 39-55, and 57-81 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not teach first polypeptides that comprise both protuberances and cavities, nor does it teach second polypeptides that comprise both protuberances and cavities, nor does it teach both simultaneously or concurrently. This is a written description new matter rejection.
5. Claims 40-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 1649

applicant regards as the invention. The examiner could not determine the metes and bounds of "more than one (a) or (b)" or "more than one of both (a) and (b)" because first polypeptides that comprise both protuberances and cavities, and second polypeptides that comprise both protuberances and cavities, and both simultaneously or concurrently are very indefinite and vague and do not set forth in a clear manner what Applicant is trying to encompass and what the public should be aware of as the protected invention.

6. No claim is allowed.

7. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technical Center 1600 general number which is (571) 272-1600.
